

## Cobb Tool: Your First Choice and Last Search for Precision Machining

Cobb Tool, a full-service precision CNC machine shop, produces a broad spectrum of machined parts – from one-of-a-kind prototypes to limited quantity specialty items to volume production quantities of parts that meet exacting machining specifications.

**CNC Machining**

**Prototype Milling**

**Production Machining**

We bring the most innovative and up-to-date technology and equipment to the table along with seasoned craftsmen who plan, troubleshoot, adapt and deliver parts that meet your rigorous standards. Our experienced craftsmen deliver a shop-wide commitment to meeting project and relationship expectations – across a variety of industries from automotive and manufacturing to energy and healthcare.

We continuously invest in both up-to-date machinery and innovative software to enable our engineering team and skilled machinists to create and execute innovative but practical approaches to the execution of your projects.

We have a pathological desire to please our customers. That goes for both our project results and for the process we take to get there. It is our obligation to produce a finished product that satisfies you. We always bring our experience to the table to make your project easier, faster and cheaper — while still meeting your needs.

- Milling Capacity up to 30" wide x 72" long x 28" tall
- CNC Lathe Capacity up to 8" diameter x 19" long
- Manual Lathe Capacity up to 21" diameter x 110" long, and 32" diameter x 7" long
- For a full list of on-site machinery, refer to [cobbtool.com/equipment-list](http://cobbtool.com/equipment-list)

## Focus on Smart Solutions

Cobb Tool can meet almost any size machining demand – from individual hand tools to custom machine parts suitable for robotic assemblies to jobs with demands for 300 to 400 finished pieces per month.

*Individualized unique application, Cobb Tool turned out a pair of manufacturing hand tools for the automotive industry.*

*Cobb Tool recently created a series of custom machined parts that serve as the nests and guides for an automated robotic assembly machine in the manufacture of complex electrical connectors.*

*Pinch hitting for a job gone wrong, Cobb Tool recognized a potential customer's emergency needs, met the demands of its part, and won a long-term repeat customer.*

## Cobb Tool – Machining with Precision Focus on Exceeding Customer Needs

Cobb Tool, a full-service design-and-build welding fixture manufacturer, meets the production needs of customers across the Southeast United States from just outside Atlanta. For each of your projects, we make recommendations based on cost-effective solutions to deliver the very best value for your time and money. Our customers deserve a precision machining resource that operates like a business – in every part of the relationship. Cobb Tool makes sure to focus on delivering customer-focused results every step of the way. That means we:

- Consistently deliver quality work – perfect finished parts and exacting welding fixtures that work in your production process
- Strive to efficiently design and execute your project to save you both time and money
- Treat our customers as we'd like to be treated ourselves
- Are flexible and easy to deal with, fun to work with even
- Respectfully deal with the inevitable challenges and changes that come up in many projects
- Are committed to see a project through to its end, no matter what
- Stand by our work
